## Research Experience

---

- **Sorbonne université — Institut des Systèmes Intelligents et de Robotique (ISIR)** Paris, France  
Research Intern Aug 2025 – Present  
**Supervisor: Dr. Heike Stein**
  - Modeling population-level neural dynamics in the head-direction system using Gaussian-process state-space models (GPSSMs), treating observed spiking activity as noisy evidence about a low-dimensional latent angular state evolving under nonlinear dynamics.
- **École Normale Supérieure (ENS) — Human Reinforcement Learning Lab** Paris, France  
Research Intern Feb 2024 – June 2025  
**Supervisor: Dr. Stefano Palminteri**
  - Investigated the computational mechanisms of experiential knowledge transmission (e.g., teaching) by designing and implementing an online behavioural experiment ([demo](#)), recruiting and testing 50 participants.
- **Ludwig Maximilians Universität München - Crowd Cognition Group** Remote  
Undergraduate Research Assistant June 2021 - August 2024  
**Co-supervisors: Dr. Bahador Bahrami, Prof. Dr. Ophelia Deroy**
  - Fitted reinforcement-learning models to behavioral data from a Go/NoGo task to infer latent cognitive parameters underlying Pavlovian-instrumental interactions; published results as first author.
  - Quantified goal-directed vs. habitual control in social decision-making by fitting model-based and model-free reinforcement-learning models to behavioral data and co-authoring the manuscript.
  - Developed real-time eye-tracking pipelines for interactive environments and characterized gaze dynamics using time-series analysis and visual saliency representations.
